

Data Call, May 30, 2007

Attending: Ann (ISI), Dan (ANL), Andrew (Fermi), Nick (Wisc)

Continuing work on GridFTP/NeST integration
Coming along well
Long-term development project
On track for delivery of basic functionality by year-end

Fermi: working on GridFTP checksumming in dcache
Server side is complete
Working on client
When GridFTP/NeST gets further along, will be integrated into dcache

Placement services
Continued design of placement services
Modifying an existing Grid simulator to look at wider variety of data placement algorithms
Plan to do a comprehensive simulation study

Data face-to-face meeting planned for July 19-20th at Fermi Labs

Proposal for data team to meet with Jerome Lauret of STAR project on the afternoon of Monday June 18th.

Attempting to set up meetings with application groups at Scidac Conference.
